This is to certify that the plants, plant product or other regulated articles described herein have been inspected and/or tested according to appropriate official procedures and are considered to be free from the quarantine pests, specified by the importing contracting party and to conform with the current phytosanitary requirements of the importing contracting party including those for regulated non-quarantine pests.

III. ANNEX

1

1.a

The consignment was inspected and found free from visible quarantine pests. Traceability code UG/119/02/25019. *Solanum aethiopicum* Consignment complies with Annex VII, point 68 c of Commission Implementing Regulation (EU) 2019/2072 and Traceability code mentioned on the certificate, originate from a place of production established by the national plant protection organisation of Uganda as being free from *Neoleucinodes elegantalis* (Guenée) in accordance with the relevant International Standards for Phytosanitary Measures and official inspections have been carried out in the place of production at appropriate times during the growing season to detect the presence of the pest, including an examination on representative samples of fruit, shown to be free from *Neoleucinodes elegantalis* (Guenée), and information on traceability is included in the phytosanitary certificate referred to in Article 71 of Regulation (EU) No 2016/2031. Consignment meets the conditions laid down in Article 4 c of Commission Implementing Decision 2018/638/EC; they comply with the following conditions: (i) They have been produced in a production site which is registered and supervised by the national plant protection organization of Uganda; (ii) Official inspections have been carried out in the production site during the three months prior to export, and no presence of *Spodoptera frugiperda* has been detected on *Solanum aethiopicum* (iii) Prior to their export, they have been subject to an official inspection and found free from *Spodoptera frugiperda*; (iv) Information ensuring the traceability of *Solanum aethiopicum* to their site of production has been ensured during their movement prior to export. (v) The specified plants have been produced in a production site which is provided with complete physical protection against the introduction of *Spodoptera frugiperda*.
