PHYTOSANITARY CERTIFICATE

No. PC-00K8Q0BB2C508L

Additional Information			
Import Permit Number:	N/A	Date of Inspection:	11-08-2025 21:03

This is to certify that the plants, plant product or other regulated articles described herein have been inspected and/or tested according to appropriate official procedures and are considered to be free from the quarantine pests, specified by the importing contracting party and to conform with the current phytosanitary requirements of the importing contracting party including those for regulated non-quarantine pests.

This certificate replaces and cancels PC-9F9HTU05I0FV82 issued on 2025-08-10 due to update of an item.

III. ANNEX

1

1.a

The consignment complies with Commission Implementing Regulation (EU) 2022/959 Amending Annex VII, point 62 d of Commission Implementing Regulation (EU) 2019/2072. The fruits of *Capsicum frutescens*: (i). Have been produced in an approved site of production, which is included in the list of production site codes that has been communicated in advance in writing to the Commission by the National Plant Protection Organization of Uganda, and (ii). Have been subjected to an effective systems approach to ensure freedom from *Thaumatotibia leucotreta* (Meyrick), in accordance with the International Standards for Phytosanitary Measures 14 (ISPM 14), the systems approach & documentary evidence of its effectiveness has been communicated in advance in writing to the Commission by the National Plant Protection Organization of Uganda, and (iii). Prior to export, have been subjected to official inspections for the presence of *Thaumatotibia leucotreta* (Meyrick), with an intensity to enable at least the detection of 2 % level of infestation, with a level of confidence of 95 % in accordance with the International Standard for Phytosanitary Measures 31 (ISPM 31) and including destructive sampling in case of symptoms, and (iv). Are accompanied by a phytosanitary certificate that indicates the production site codes.

1.b

The consignment complies with Option (c), Article 10.1 of Commission Implementing Regulation (EU) 2023/1134 of 8 June 2023 on measures to prevent the introduction into, establishment and spread within the Union territory of *Spodoptera frugiperda* (Smith), amending Implementing Regulation (EU) 2019/2072 and repealing Implementing Decision (EU) 2018/638. The fruits of *Capsicum frutescens* fulfil the following requirements: Prior to export the fruits of *Capsicum frutescens* have been subject to an official inspection and found free from the *Spodoptera frugiperda* (Smith), and originate from a site of production complying with the following conditions: (i). it is registered and supervised by the National Plant Protection Organization of Uganda; (ii). official inspections have been carried out during the last three months prior to export, and no presence of the *Spodoptera frugiperda* (Smith), has been detected on the fruits of *Capsicum frutescens*; (iii). it has physical isolation against the introduction of the *Spodoptera frugiperda* (Smith); (iv). information ensuring traceability of the fruits of *Capsicum frutescens* to that site of production has been ensured during their movement prior to export.

2

2.a

The consignment complies with Option (c), Article 10.1 of Commission Implementing Regulation (EU) 2023/1134 of 8 June 2023 on measures to prevent the introduction into, establishment and spread within the Union territory of *Spodoptera frugiperda* (Smith), amending Implementing Regulation (EU) 2019/2072 and repealing Implementing Decision (EU) 2018/638. The fruits of *Solanum aethiopicum* fulfil the following requirements: Prior to export the fruits of *Solanum aethiopicum* have been subject to an official inspection and found free from the *Spodoptera frugiperda* (Smith), and originate from a site of production complying with the following conditions: (i). it is registered and supervised by the National Plant Protection Organization of Uganda; (ii). official inspections have been carried out during the last three months prior to export, and no presence of the *Spodoptera frugiperda* (Smith), has been detected on the fruits of *Solanum aethiopicum*; (iii). it has physical isolation against the introduction of the *Spodoptera frugiperda* (Smith); (iv). information ensuring traceability of the fruits of *Solanum aethiopicum* to that site of production has been ensured during their movement prior to export.
